Design at its best

“Daikin Emura was designed to perfectly balance technological leadership and the beauty of aerodynamics.”

Alexander Schlag,

Managing Director at yellow design gmbh

yellow design gmbh

About Daikin

Daikin has a worldwide reputation based on 90 years' experience in the successful manufacture of high quality air conditioning equipment for residential, commercial and industrial use and 56 years as a leader in heat pump technology.

It's all about design

Design is everything. It is in the choice of creating sleek, elegant climate control that looks great. It's also in the choice of smart technology that ensures comfortable interiors at all times.

Designed in Europe for Europe

The Daikin Emura is the result of ongoing research into creating superior air conditioning solutions for European interiors. The first Daikin Emura was released in 2010 and the split system wall-mounted air conditioner redefined the notion of climate control in European interior design. The new generation adds even greater functionality, making it ever more relevant to the European architectural aesthetics, technical standards and user demands.

Award winning design

Daikin Europe N.V. is proud to announce that Daikin Emura has been awarded with Reddot design award 2014, German Design Award - Special mention 2015, Focus Open 2014 Silver and Good Design Award 2014. Daikin Emura was evaluated by an international jury that awards this seal of quality only to products that stand out thanks to its excellent design.

Daikin Emura

an icon of contemporary climate control

Daikin Emura once again proves that intelligent design can look great and deliver superior energy efficiency in climate control. So the indoor environment is optimised and architects, engineers and home owners get the ideal solution.

Air-to-air heat pumps extract 80% of their output energy from a surprising renewable source: ambient air, effectively transferring existing heat. High energy efficiency is obtained by using advanced energy-saving technologies such as re-designed swing compressors.

Smart & Efficient

- › Curved front panel
- › Sleek, elegant appearance
- › Smooth operation
- › Intelligent sensors for optimal performance
- › Large flaps as key design element

Features

› Stylish finish in silver, anthracite or pure matt white

› High efficiencies with SEER up to

› Available in R-32 and R-410A

R-32

R-410A

› Whisper quiet sound levels, down to 19dB(A)

› Ensures maximum comfort in every situation

› Wide operating range: -10 to 46°C for cooling and -15 to 20°C for heating

› Optimised heating range available with operation range down to -25°C in heating

› Can be controlled remotely

year round Comfort

Daikin Emura is a highly Intelligent system with innovative features

2-area intelligent eye

The two-area intelligent eye sensor controls comfort in two ways. If the room is empty for 20 minutes, it changes the set point to start saving energy. As soon as someone enters the room, it immediately returns to the original setting. The intelligent eye also directs air flow away from people in the room to avoid cold draughts.

Whisper quiet, down to 19 dB(A)

3D air flow

To ensure a harmonised temperature throughout the room, the Daikin Emura's 3D air flow system combines vertical and horizontal auto-swing creating an even distribution of air throughout the room to the corners of even large spaces.

Comfort mode

Draught-free operation improves comfort. When cooling, the flap positions itself horizontally to prevent cold airflow from being blown directly onto the body. When heating, the flap turns vertically downwards to drive warm air to the bottom of the room.

Clean air

A sophisticated titanium apatite photocatalytic air purification filter traps even microscopic airborne dust particles, absorbs organic contaminants such as bacteria and viruses and even breaks down odours.

Night set mode

Rapid changes in room temperature can disturb your sleep. To avoid this, Daikin Emura prevents overheating or overcooling during the night. If the timer is switched on, the unit will automatically set the temperature to 0.5°C warmer when cooling and to 2°C cooler when heating.

Always in
Control

Discover a new world

Easy control from everywhere

The easy-to-use remote control gives you absolute control of the room temperature from wherever you are. Sit back, check the large display and put all of Daikin Emura's built-in intelligence to work through user-friendly buttons.

smart WLAN control/ smart energy saving

The plug-and-play extra WLAN device (see note on page 10) allows you to set and even schedule the temperature from anywhere, using iOS or Android systems. So you can manage the unit when away from home, offering optimal climate control while saving energy.

WLAN control via app

Cooling & heating

R-410A R-32

In the pursuit of greater energy efficiency and reduced environmental impact, Daikin Emura is now available in R-410A and R32 range. Choosing for an R32 product, reduces the global warming potential with 68% compared to R-410A and thanks to its high energy efficiency it leads directly to lower energy consumption.

Wireless LAN Connecting Adaptor <BRP069A41> meets all of the following:

- Generally available to the public by being sold, without restriction, from stock at retail selling points by means of any of the following:
 - Over-the-counter transactions;
 - Electronic transactions;
 - Mail order transactions;
 - Telephone call transactions.
- The cryptographic functionality cannot easily be changed by the user.
- Designed for installation by the user without further substantial support by the supplier.
